DETAILED ACTION

Claim Rejections - 35 USC § 101

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claim 11 is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The invention is directed towards an apparatus, however nowhere in the claim is there found a description of a physical structure. The claim contains limitations which seem to be a copy of the method limitations of the previous claims 1-10, with the addition of the terms: a calculator, a combiner, a verifier and a suppressor without any descriptive support for such claim limitations being physical structures.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim 11 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

Art Unit: 2136

The Specification provides no support for the claimed apparatus of claim 11 comprising physical structures such as claimed apparatus components a calculator, a combiner, a verifier and a suppressor.

Specification

3. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: Claim 11 recites an apparatus comprising a calculator, a combiner, a verifier and a suppressor, none of which is supported by the Specification.

Allowable Subject Matter

4. Claims 1-10 are allowed.
